CLIENT FEEDBACK

"SEGH 2010 International Conference and Workshops proved to be a historical success, and I would like to thank Go West for providing the efficient administrative services. Staff members of Go West were hard-working, flexible and approachable. Delegates of SEGH 2010 were impressed and many of them praised the excellent organization for abstract submission, registration, welcome reception, conference sessions, workshops, fieldtrips and conference banquet. With the administrative support of Go West, I was able to focus my energy on academic issues, making my life of organizing such an internationally important event much easier than expected."

Dr. Chaosheng Zhang, Chair, SEGH 2010 International Conference and Workshops

"I contracted Go West to look after the organizing of this conference. They did an absolutely fantastic job and their degree of professionalism and attention to detail was exceptional. Such was their professionalism that I was able to not worry about the operational elements of running the conference during the conference itself and was free to entertain the conference attendees."

Professor Willie Golden, Dean, College of Business, Public Policy and Law, NUI Galway

"Go West looked after all aspects of Conference administration. They were onsite to oversee the set up and operation of the actual conference and to manage registration. I have no hesitation in recommending Go West as an invaluable resource to all conference organisers in terms of expertise, service, support, value for money and understanding the requirements of a scientific conference."

Dr. Dymphna Waldron, Consultant in Palliative Medicine, Galway University Hospitals (GUH)

"I have no hesitation in recommending Go West as professional Conference Organisers - they did outstanding work for me during the Power Electronics Specialists Conference (PESC). PESC brought 530 leading experts and guests from 40 countries from around the world - it was a wonderful opportunity to showcase the University, Galway and to network with International Colleagues. Go West looked after the organisational details while I concentrated on the technical programme. The feedback from the delegates was a source of great pride for me."

Professor W G Hurley, Electrical & Electronic Engineering, NUI Galway

Directors of Go West, Kathleen Mc Donagh, Kerry O' Sullivan
